

LM Actuator

Equipped with Caged Ball
LM Guides and QZ Lubricator
for Ball Screw

GL-N

**US Only
Quick Delivery**

** Standard options only. Please refer to list in page 6.*

For details, visit THK at www.thk.com

*Product information is updated regularly on the THK website.

Structures of LM Actuator GL-N Model

Ball Screw

Figure 1 Ball Screw Type Structure

Timing Belt

Figure 2 Timing Belt Type Structure

Features of LM Actuator GL-N Model

Lightweight, high rigidity aluminum base with Caged Ball LM Guides has been utilized for the guide portion. A screw or belt options are available for the drive system.

In addition, Caged Ball LM Guides and QZ Lubricator for the Ball Screw has been utilized to provide a long-term maintenance free actuator.

Utilizing Caged Ball LM Guide (SSR, SHS)

SSR model: Due to its 90-degree ball contact structure, is best suited to horizontal applications with relatively low moment loads.

SHS model: It can handle loads from all directions (radial, reverse radial, and horizontal) with its 4-way equal load rating capability.

Drive System

[Ball Screw Type]

Variety of screw leads can be selected.

Table 1 Ball Screw Leads by Model Numbers (Rolled ball screw)

Model number	Ball Screw lead (mm)
GL15N	5, 10, 16, 20, 30
GL20N	5, 10, 20, 40

Note: For wrap-around motor types, three motor directions (left, right and bottom) can be selected. (See page 4 for details.)

[Timing Belt Type]

Highly rigid timing belt ensures that high speed processes are possible for longer stroke applications than the Ball Screw driven type.

Table 2 Pitch Diameter of the Timing Pulley

Model number	Pitch diameter (mm)	Slider move distance per pulley rotation (mm)
GL15N	35.01	$35.01 \times \pi \approx 110$
GL20N	38.20	$38.20 \times \pi \approx 120$

Note: Because the timing pulley has a large pitch diameter, the use of a reducer is recommended. For details, see pages 18 and 19.

Figure 3 Slider move distance per pulley rotation

Lightweight and High Rigidity

By using a hollow aluminum extrusion, lightweight and high rigidity is achieved.

Table 3 Geometrical Moment of Inertia and Weight in the Base

Model number	Geometrical Moment of Inertia		Weight (kg/m)
	I_x (mm ⁴)	I_y (mm ⁴)	
GL15N	1.61×10^5	2.47×10^6	4.85
GL20N	3.15×10^5	4.28×10^6	6.47*

* The weight of the SSR model is 6.69kg/m.

Figure 4 Base Section

GL-N Model also available with optional QZ Lubricator

A Caged Ball LM Guide and QZ Lubricator for the Ball Screw have been utilized to ensure a long-term maintenance-free actuator.

Ensuring Adaptability with Most Advanced Motors

A large variety of flanges have been engineered so that a wide selection of motor options are available to be used with the GL-N.

Multiple Options Available

Multiple options such as covers, bellows, sensors and cable carriers are available.

Compatible with the Conventional GL Model

Due to the dimensions between the GL models and the GL-N models are same.
Replacing with the GL-N is easily possible (GL20N).

Figure 6 Cross-section comparative views

Types and Features

Types of Drive Systems

[Ball Screw Drive]

Direct Mounting

Direct mounting of Motor to Ball Screw.

Lateral wrap-around Option

Axial dimensions are kept to minimum by applying the Wrap-Around option.
(Pulley ratio: 1:1)

Bottom wrap-around Option

When horizontal space is at a minimum, the bottom side Wrap-Around option is available.
(Pulley ratio: 1:1)

[Timing Belt Type]

Horizontal Mounting

Note 1: Please mount Model GL-N horizontally. Contact THK if Model GL-N will be mounted on a wall.

Note 2: Please note that Model GL-N with timing belts cannot be mounted vertically.

Model number			GL15N							GL20N				
Drive system			Ball Screw					Belt	Ball Screw				Belt	
Screw lead (mm)			5	10	16	20	30	—	5	10	20	40	—	
Pulley pitch diameter (mm)			—					35.01	—				38.20	
Repeatability ^{Note 1)} (mm)			±0.02					±0.08	±0.02				±0.08	
Effective stroke ^{Note 2)} (mm)			100 to 1200					50 to 1700	200 to 1550				150 to 2700	
Maximum load capacity guideline ^{Note 3)} ^{Note 4)} [kg]	200W	Horizontal	60	60	50	45	20	30	—	—	—	—	—	
		Vertical	20	16	10	10	3	—	—	—	—	—		
	400W	Horizontal	—	—	—	—	—	—	70	70	60	15	50	
		Vertical	—	—	—	—	—	—	30	30	13	6	—	
Static permissible load ^{Note 5)} [N]	Reverse radial direction		9600							14300				
	Horizontal direction		2900							4500				
	Axial direction		2100					—	2200				—	
Static permissible moment ^{Note 6)} [N-m]	M _A		430							710				
	M _B		240							430				
	M _C		610							1020				

Note 1: This repeatability is ensured at an ambient temperature of 20°C.

Note 2: The effective stroke decreases depending on the table length. See the dimensional drawings (pages 7 to 14) for stroke details.

Note 3: Maximum load capacity guideline is determined based on rated revolution of the motor at the acceleration of 0.3G.

The motor capacity assumes the use of an AC servomotor.

Note 4: Values for the belt drive type are guidelines when using 1/5 reducers.

Note 5: The static permissible load is determined by the bolt joint strength, and the static rated load of the LM guide unit, ball screw unit and the support bearing.

For safety purposes, please take into consideration that the strength of the actuator mounting unit is not included.

Note 6: The static permissible moment is the maximum value of the moment in each direction.

For details on fatigue life, see "Service Life Time and Static Safety Factor" on pages 25 to 26.

MA : Pitching direction

MB : Yawing direction

MC : Rolling direction

Figure 7 Directions of static permissible moment

Types of Tables

S type: Short table (applicable LM Guide model number: SSR-XV)

A short table length ensures a longer stroke.

L type: Long table (applicable LM Guide model number: SSR-XW, and SHS-V)

This table is suitable for mounting large sized objects or if the load is off center.

L-QZ type: Long table with an LM Guide QZ Lubricator (applicable LM Guide model numbers: SSR-XWQZ and SHS-VQZ)

The LM Guide is provided with a QZ Lubricator. (This table is longer than the L-type table. See dimensional drawings for more details.)

Note: QZ lubricator is not available for S type table option.

Maximum Travel Speed of the LM Actuator

Ball Screw Type

Ball Screws have an allowable rotational speed based on the DN value and the critical speed.

The table travel speed (mm/s) of the LM Actuator depends on the rotational speed of the Ball Screw and the rated rpm (3000 min⁻¹) of the AC servo motor.

Maximum travel speed

Unit: mm/s

Nominal model number		GL15N					GL20N			
Ball Screw lead		5	10	16	20	30	5	10	20	40
Base length	340	248	500	800	1000	1500	—	—	—	—
	460	248	500	800	1000	1500	202	500	1000	2000
	580	248	500	800	1000	1500	202	500	1000	2000
	700	248	500	800	1000	1500	202	500	1000	2000
	820	248	500	800	1000	1500	202	500	1000	2000
	1060	207	391	685	776	1175	202	396	1000	2000
	1240	144	271	474	540	815	185	275	763	1533
	1420	105	198	349	396	595	136	201	560	1120
	1600	—	—	—	—	—	104	—	426	860
1780	—	—	—	—	—	82	—	336	673	

Note: The LM actuator may not reach the maximum travel speed if the moving distance is short.

Timing Belt Type

The table shown below summarizes the table travel speed (mm/s) of when the LM Actuator is equipped with a reducer and the AC servo motor is operated at a rated rpm (3000min⁻¹).

Maximum travel speed

Unit: mm/s

Nominal model number		GL15N			GL20N		
Reduction ratio		1/3	1/5	1/9	1/3	1/5	1/9
Maximum travel speed		1833	1100	611	2000	1200	667

Note 3: Cover is applied up to 1960mm base length.

[LM Guide]

QZ Lubricator, composed of high-density fiber net feeds the right amount of lubricant to the raceway of the LM rail. This allows oil film to continuously be formed between balls and raceways and significantly extends the lubrication and maintenance intervals.

Figure 8 QZ Lubricator Structure Diagram (LM Guide)

[Ball Screw]

An adequate amount of lubricant can be supplied to necessary locations as in the LM Guide portion so that maintenance interval can be greatly extended.

Figure 9 QZ Lubricator Structure Diagram (Ball Screw)

[Control Number]

Motor brackets are available to mount various types of motors. The following table lists by model number the motor brackets available for motors. When purchasing a motor bracket, specify the corresponding model number.

Table 4 Motors and Applicable motor Brackets

Motor						GL15N		GL20N

Note: ** represents an actual gear ratio

The GL-N model has an anti-dust cover. This cover is common to GL15N and GL20N.

Figure 10 Cover Outline View

Note 1: Cover deflection increases long, If the base is as base length increases.

Note 2: If the GL-N model is used in any position other than horizontal, a part mounted on the table might touch the cover due to deflection caused by the cover.

Note 3: Cover is applied up to 1960mm base length.

Figure 11 Section View of a Model with a Cover Receiver

The GL-N model has an anti-dust bellows as well as an anti-dust cover.

Appendix

Service Life Time and Static Safety factor

The GL-N model consists of LM Guides, a ball screw, and support units. The life and safety factor of each component can be calculated from the basic dynamic load rating and the basic static load rating. For more information on these, refer to each item (LM Guides, ball screws, and support units) in the general catalog.

The nominal life of the LM Guides and ball screw can be calculated using the technical calculation software available from the THK Technical Support Site or contained in the CD-ROM catalog. In calculating the nominal life, see the data in the following table.

Note: Please note that the calculation of life is theoretical. In actual use, the life varies depending on the service conditions such as the usage environment, the lubricating condition, the accuracy or rigidity of the area where the LM actuator is installed, and so forth.

[LM Guide]

Actuator model number		Table type	LM Guide model number	Thrust position		Rail span	Block span	Movable section			Slider height

* The base length shows the minimum and maximum lengths. Example: 034 for a base length of 340mm and 142 for a base length of 1420mm
Note: Sliding resistance listed is total for all four LM Guide blocks.

[Support Unit]

Nominal model number	Support unit fixed side		Support unit support side	
	Angular ball bearing		Deep-groove ball bearing	
	Model number	Bearing model number	Model number	Bearing model number
GL15N	GK10S	7000HTDFGMP5 (Direct-mounting specification)	GF10	608ZZ
		7000HTDBGMP5 (Wrap-around specification)		
GL20N	GK12S	7001HTDFGMP5 (Direct-mounting specification)	GF12	6000ZZ
		7001HTDBGMP5 (Wrap-around specification)		

Motor Selection

When selecting a motor that is installed on the GL-N model, refer to the following data. For details of the motor selection method and motor specifications, contact the motor manufacturer.

[Ball Screw Specifications]

Actuator model number			Ball screw shaft				
Nominal model number	Base length*1 (mm)	Ball screw	Model number	Outer diameter (mm)	Lead (mm)	Length*2 (mm)	Shaft-end outer diameter (mm)
GL15N	034	B05	BTK1605-2.6ZZ	16	5	311	ø8h7
	142					1391	
GL15N	034	B10	BLK1510-5.6ZZ	15	10	311	ø8h7
	142					1391	
GL15N	034	B16	BLK1616-3.6	16	16	311	ø8h7
	142					1391	
GL15N	034	B20	WTF1520-3ZZ	15	20	311	ø8h7
	142					1391	
GL15N	034	B30	WTF1530-2ZZ	15	30	311	ø8h7
	142					1391	
GL20N	046	B05	BTK2005-2.6ZZ	20	5	427	ø10h7
	178					1747	
GL20N	046	B10	BLK1510-5.6ZZ	15	10	427	ø10h7
	142					1387	
GL20N	046	B20	BLK2020-3.6ZZ	20	20	427	ø10h7
	178					1747	
GL20N	046	B40	WTF2040-2ZZ	20	40	427	ø10h7
	178					1747	

*1 The base length shows the minimum and maximum lengths.

Example: 034 for a base length of 340mm and 142 for a base length of 1420mm

*2 The length of a ball screw shaft is the length available for the direct-mounting specification. For the wrap-around specification, the length of the ball screw shaft is 74mm longer for the GL15N model and 78mm longer for the GL20N model.

*3 The allowable input torque is the value for the direct-mounting specification. For the wrap-around specification, contact THK.

Note: Sliding resistance listed is total for all four LM Guide blocks.

[Belt Specifications]

Actuator model number		Belt		Timing pulley

GL20N	5.3

* The belt mass is the mass for the maximum belt length.

Note: Sliding resistance listed is total for all four LM Guide blocks.

Precautions on Use

Handling

- (1) Do not disassemble this product. Doing so may allow foreign matter or objects to enter the product or cause deterioration of its precision.
- (2) Do not drop or strike this product. Doing so may damage the product. If this product is under a shock, its functions may be damaged even though it looks normal in appearance.

Lubricant

- (1) Wipe out anti-rust oil completely, then apply lubricator.
- (2) Do not mix lubricants with different properties when applying lubricants.
- (3) Contact us in advance before using this product in places subject to constant vibration, or in special environments such as clean room, vacuum, low temperatures or high temperatures, regular lubricants may not be used in such environments. Contact us to purchase the dedicated low-dust-raising grease, when using this product in a clean room.
- (4) Contact us in advance when using the special lubricant.
- (5) Lubrication is essential to ensure the best performance of this product. When no lubricant is applied, it sometimes causes not only the roller to be wear, but also the product life is shortened.
- (6) Usually, grease must be applied to this product every 100 kilometers under normal operating conditions. The interval for grease application must be determined upon initial inspection.

Notes on Use

- (1) If a foreign object or foreign matter enters this product, the ball circulation components may be damaged or its functions may deteriorate. Prevent foreign matters or objects such as trash and chips.
- (2) Contact us in advance when using this product is used in environments where coolants enter the interior of the product, because some types of coolant may lower the performance of the product's functions.
- (3) This product must be used within a temperature range from +5°C to 40°C. In addition, humidity must be 80% or less and no dew condensation must occur. Contact us in advance if planning to use this product in a different range of temperature or humidity.
- (4) Contact us in advance when using this product in a place subject to constant vibration or in special environments such as clean room, vacuum, low temperatures or high temperatures.

Storage

This product must be leveled in our package or a shipment package during stock. Avoid any place with low temperature, high temperature or high humidity. If necessary, CAD data (DXF format) for this product may be downloaded from the website of our technical support center.
